

Dr. Youssef Bassim is an orthopedic surgeon, healthcare consultant, and digital health strategist with more than 25 years of experience in clinical practice and healthcare administration. He serves as the **Chief Operating Officer** at the University of Balamand, Assistant to the President for Health Affairs, and Administrative Director of the Elias G. Chami Medical Simulation Center. He is also the **Chair of the Digital Health and Artificial Intelligence Division** at the Arab Hospitals Federation.

In addition, Dr. Bassim is **Lebanon's Chapter representative** at the World Council of Medical Tourism (WCMT), where he has introduced the model of **Smart Medical Tourism**, aiming to position Lebanon as a regional hub for digitally enabled, patient-centered, and globally competitive healthcare services.

Recently appointed as a member of the WCMT Executive Committee and as **Chief of AI Development (CAID)**, Dr. Bassim leads initiatives focused on elevating medical tourism through the integration of artificial intelligence and smart technologies.

Dr. Bassim has been at the forefront of advancing digital transformation in healthcare, with a particular focus on AI governance, digital health innovation, and accreditation frameworks that reinforce health systems in Lebanon and across the Arab region.
